Dear Casper Association,

Our motivation to be a member is to participate in the governance of decentralized protocols to promote the furtherance of blockchain technology and communities' ability to collectively manage their futures.

As a Casper node operator, participation in the votes of the Casper Association promotes the development of a more robust ecosystem in which we already participate today.

Our experience as a technology infrastructure operator includes developing, deploying, and supporting technology solutions provided to DeFi marketplaces, DAOs, and a web wallet used on Ethereum. We have hosted solutions in the blockchain space for over five years to date.

John R. Acme
